25X1A

In case John neglected to tell you before he left, we have forwarded 5 frames of film which you selected for work on the GMS project. These frames are classified SECRET-NO FORN. This film does require very strict accountability and must be returned when it is no longer of value to the project or upon termination of the project. Even if they are cut, all the pieces must be returned. In addition all reproductions must be accounted for either by delivery to us or by normal certificates of destruction.

Sincerely yours,

25X1A
